# Arielle Somerville

Arielle Somerville, also known across social media as Tony Raphielle, works at Spindlehorse Toons as their storyboard director on the beloved indie Youtube series "Helluva Boss." They have also worked under Bento Box Entertainment, A24, and Amazon on Spindlehorse's sister-show, the 2D-animated musical series “Hazbin Hotel” as a trusted storyboard artist. Most notably they have been recognized for their storyboard work for the song "Poison," nominated for a Concept Art Award in 2024. They have been working in the animation industry since February 2020, but have been filming and making live-action videos as a hobby with friends and family from a very early age. With an additional background in dance and theatre, Somerville has brought a unique and dramatic vision to their projects, specializing in giving their cartoons a raw and realistic grit with on-camera style acting, and somehow always finding a way to include complex dance choreography as their signature. Their wide skill set and tenacious diligence have paved the way for their fast rise to director.
