CONCEPT ART AWARDS
JURADO 2021

Daphne Yap

My career began as a Designer / Illustrator in the Toy Industry. I created many toy designs for both girls and boys that targeted various age groups. Responsibilities included ideating/brainstorming,stylizing and designing toys/figures/soft goods/play sets and seeing them through to manufacture. I enjoy coming up with new identities for brands as well as working within constraints of existing brands.

Later I went into the film industry as a Concept Artist where I applied similar practices and skills to concepts that ultimately became film. I created many different concepts for characters, creatures, costumes, props and environments! I've worked on "Avatar", "Alice In Wonderland", "Star Trek", "Thor" and many others.

I love designing bits and pieces from different worlds!
