# *Asian Ways of Managing Conflicts: A Cross Cultural Examination of Tactical Behaviors in Interpersonal Conflicts*

Assoc. prof. GRAŽINA ČIULADIENĖ

# The Content

- **Conflict management styles**
- **Culture's impact on conflict behaviour**
- **Asians preferences of strategies to manage interpersonal conflicts**

# DEFINITION(S)

- the perceived and / or actual **incompatibility** of values, expectations, processes, or outcomes between two or more parties over substantive and/or relational issues” (Ting-Toomey, 1994).
- a **communicative exchange** between at least two *interdependent* parties who have different, opposite, or incompatible opinions and goals and who perceive that the other is interfering in the achievement of his or her goals (Hocker & Wilmot, 1995).
- incompatible **activities**, where one person’s actions are interfering, obstructing, or in other ways making *the behavior of another less effective* (Deutsch).

# DEFINITION(S)

## CONFLICT MANAGEMENT STYLE

- **an overall approach to conflict interaction / an overall picture of a person's communication orientation toward conflict.**
- **Patterned responses or clusters of behavior, that people use in conflict**
- **Individuals have a predominant conflict style**
- The classification schemes range from the two-style approach to the ten-style approach.

1 – never

2-seldom

3-sometimes

4-often

5-always

**How do you prefer to manage conflicts?**

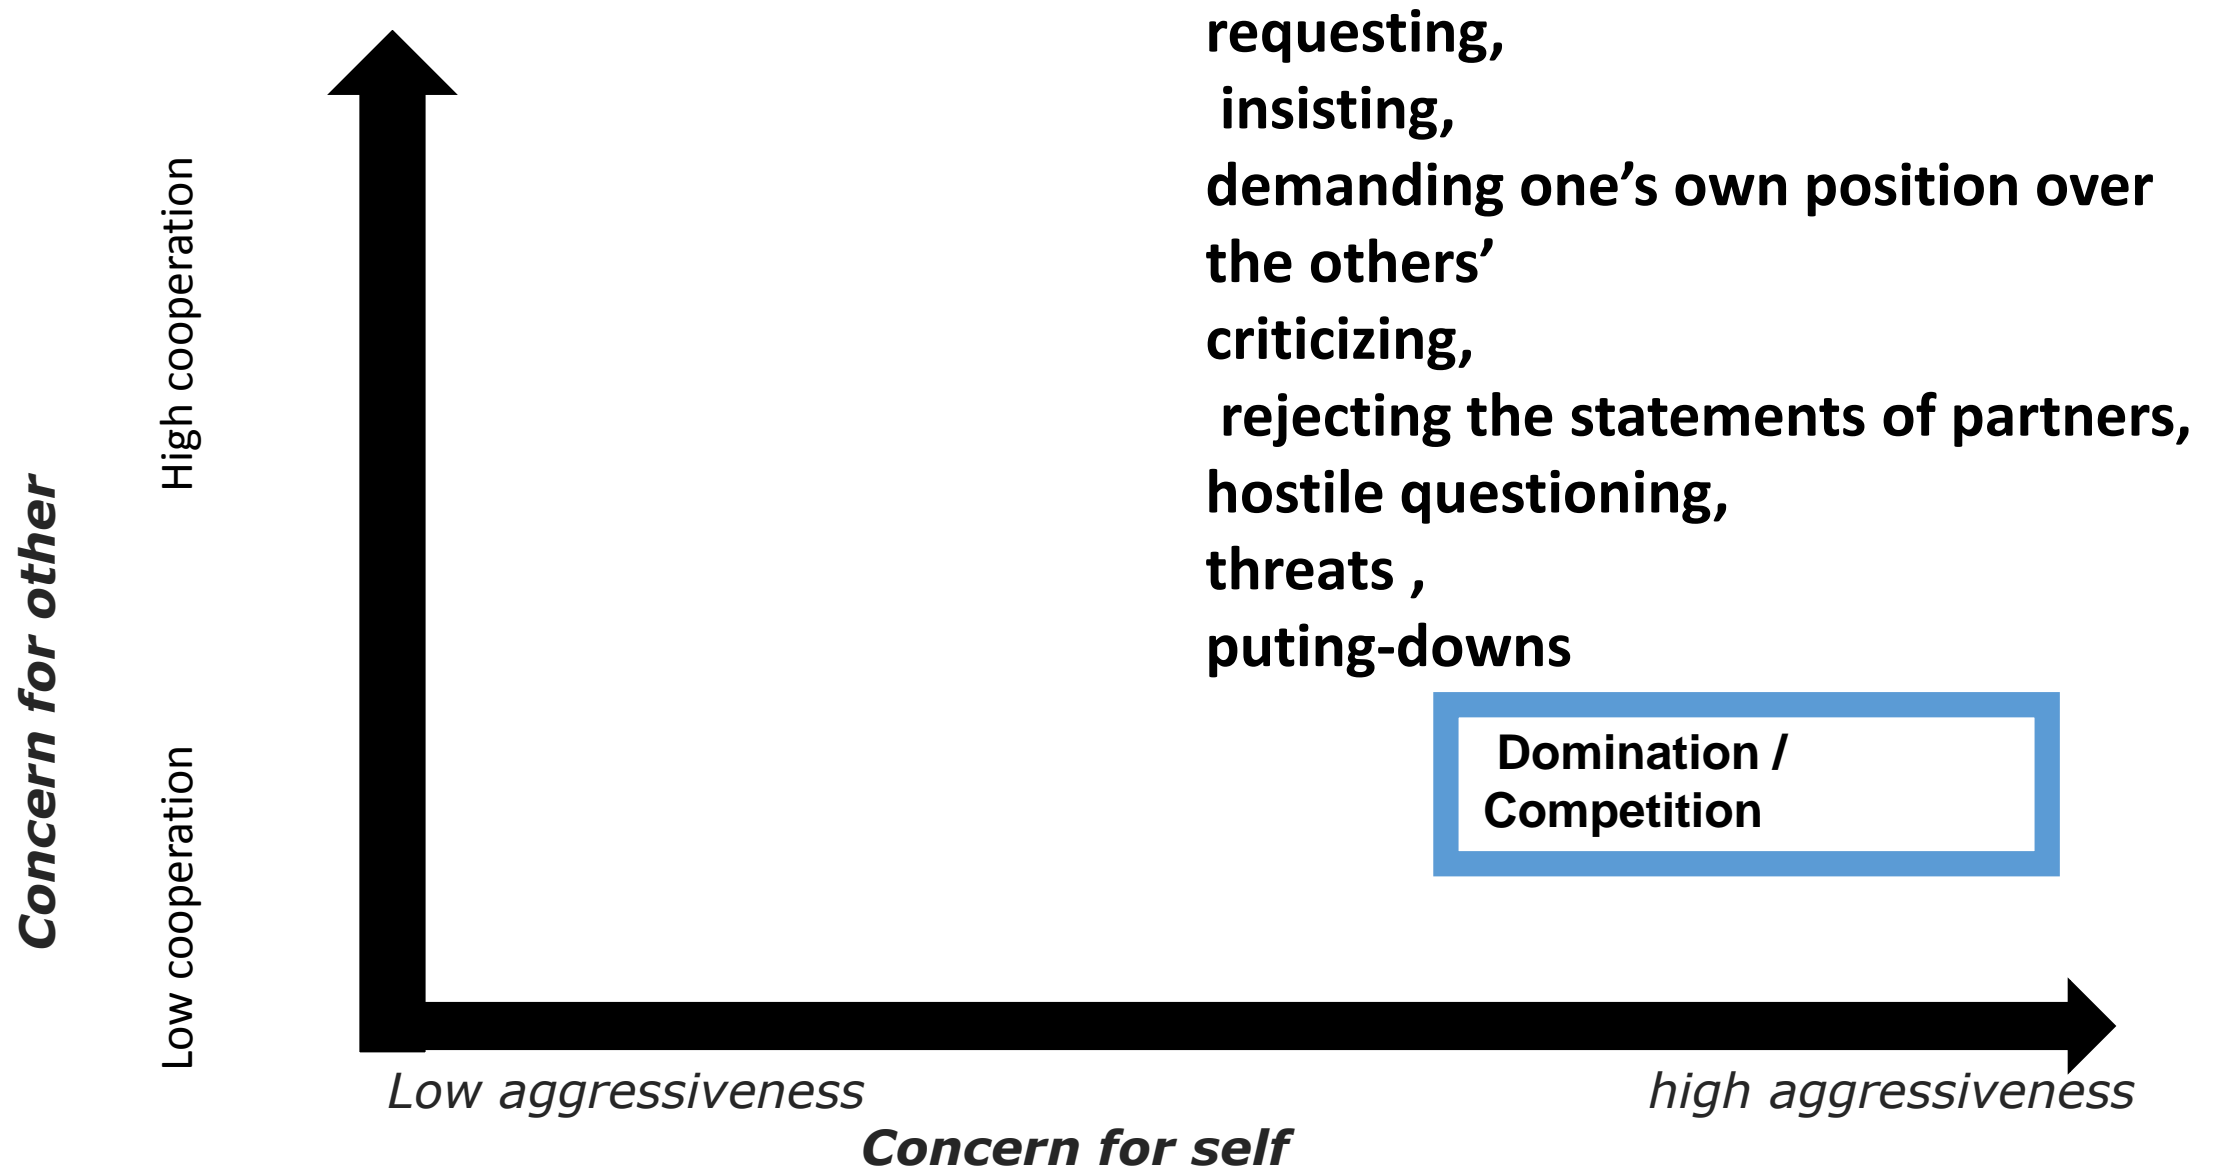

**CONFLICT STYLE MANAGEMENT**

- 1. I avoid being put on the spot. I keep conflicts to myself**
- 2. I use my influence to get my ideas accepted**
- 3. I usually try to split the differences in order to resolve an issue**
- 4. I generally try to satisfy the others' needs.**
- 5. I try to investigate an issue to find a solution acceptable to us**
- 6. I usually avoid open discussion of my difference with people**
- 7. I use my authority to make a decision in my favor**
- 8. I try to find a middle course to resolve and inpass**
- 9. I usually acommodate the others' issues**
- 10. I try to integrate my ideas with the other to come up with a decisión**
- 11. I try to stay away from disagreement**
- 12. I use my expertise to make decisions that favor me.**
- 13. I propose a middle ground for breaking dead-locks**
- 14. I give in to other persons' ambitions**
- 15. I try to work with others to find solutions that satisfy both our expectations**
- 16. I try to keep my disagreements to myself in order to avoid hard feelings**
- 17. I generally pursue my side of an issue**
- 18. I negotiate with others to reach a compromiso**
- 19. I often go with the others' sugestions**
- 20. I exchange accurate information with others so that we can solve a problema together**
- 21. I tried to avoid unpleasent exchanges**
- 22. I sometimes use my power to win**
- 23. I use give and take so that a comprimese can be reached**
- 24. I try to satisfy the others' expectations**
- 25. I try to bring all our concerns out in the open so that issues can be solved.**

# The styles of conflict management (Thomas 1976; Kilmann and Thomas 1975)

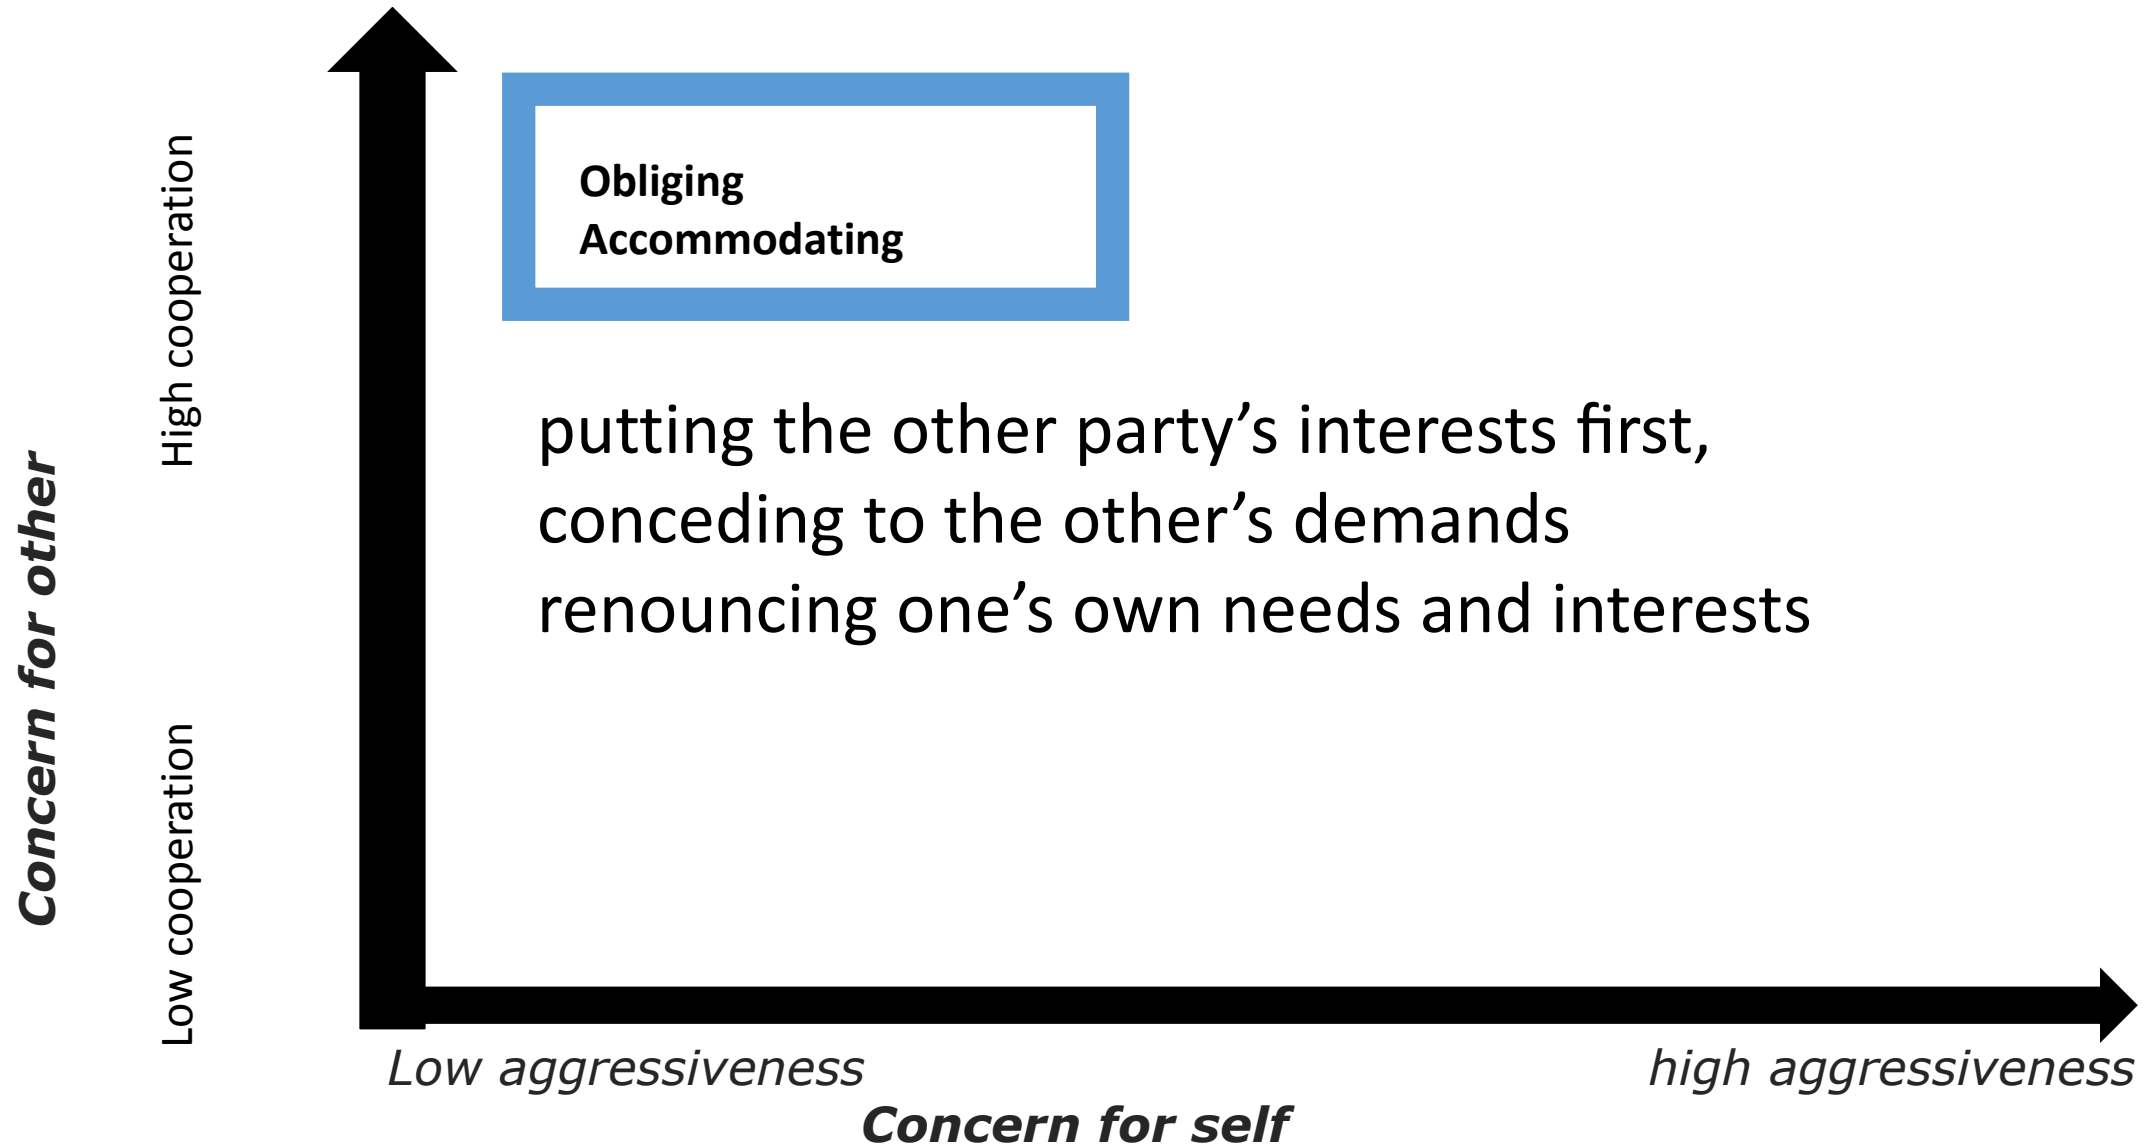

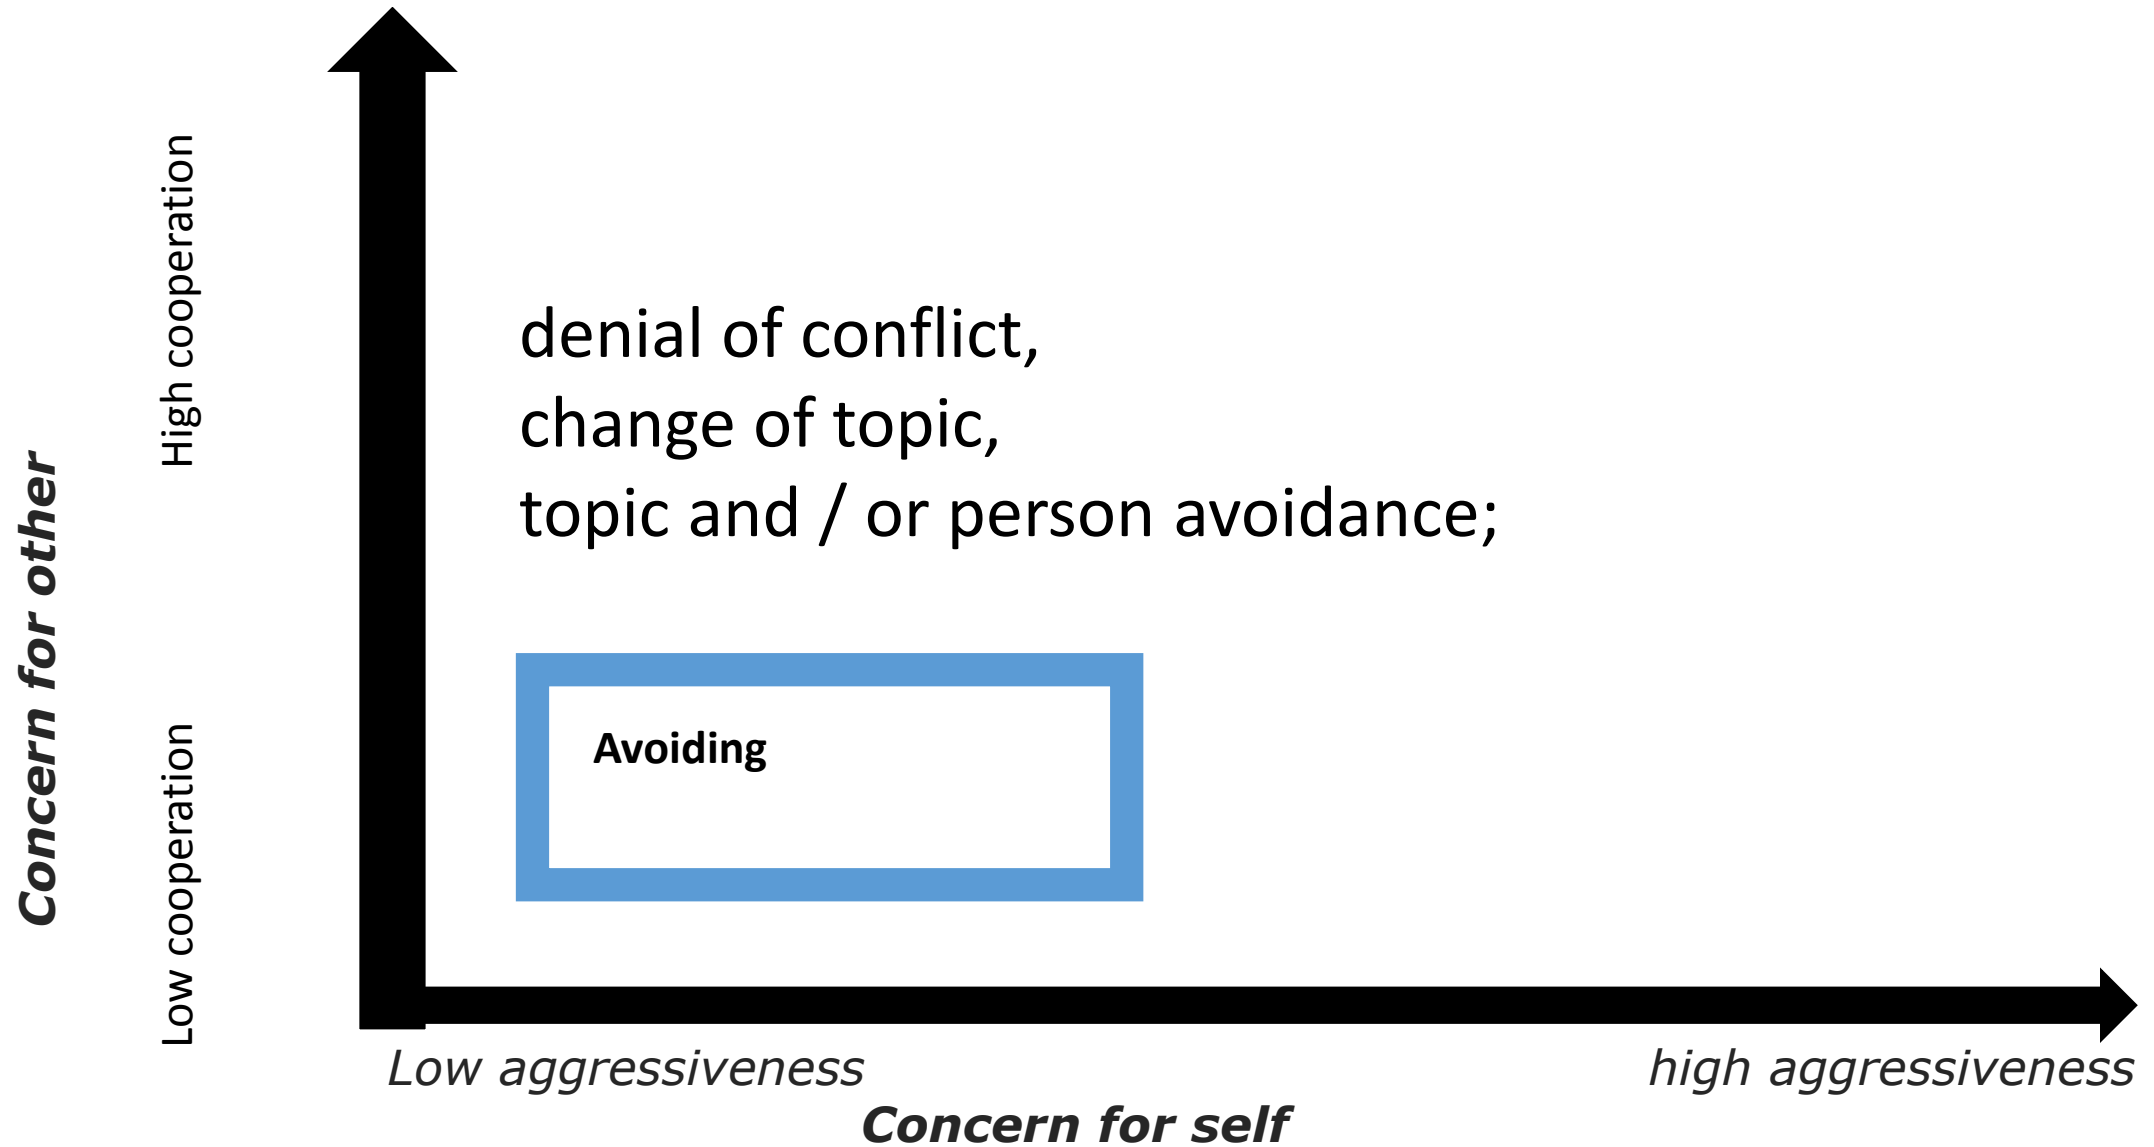

# The styles of conflict resolution

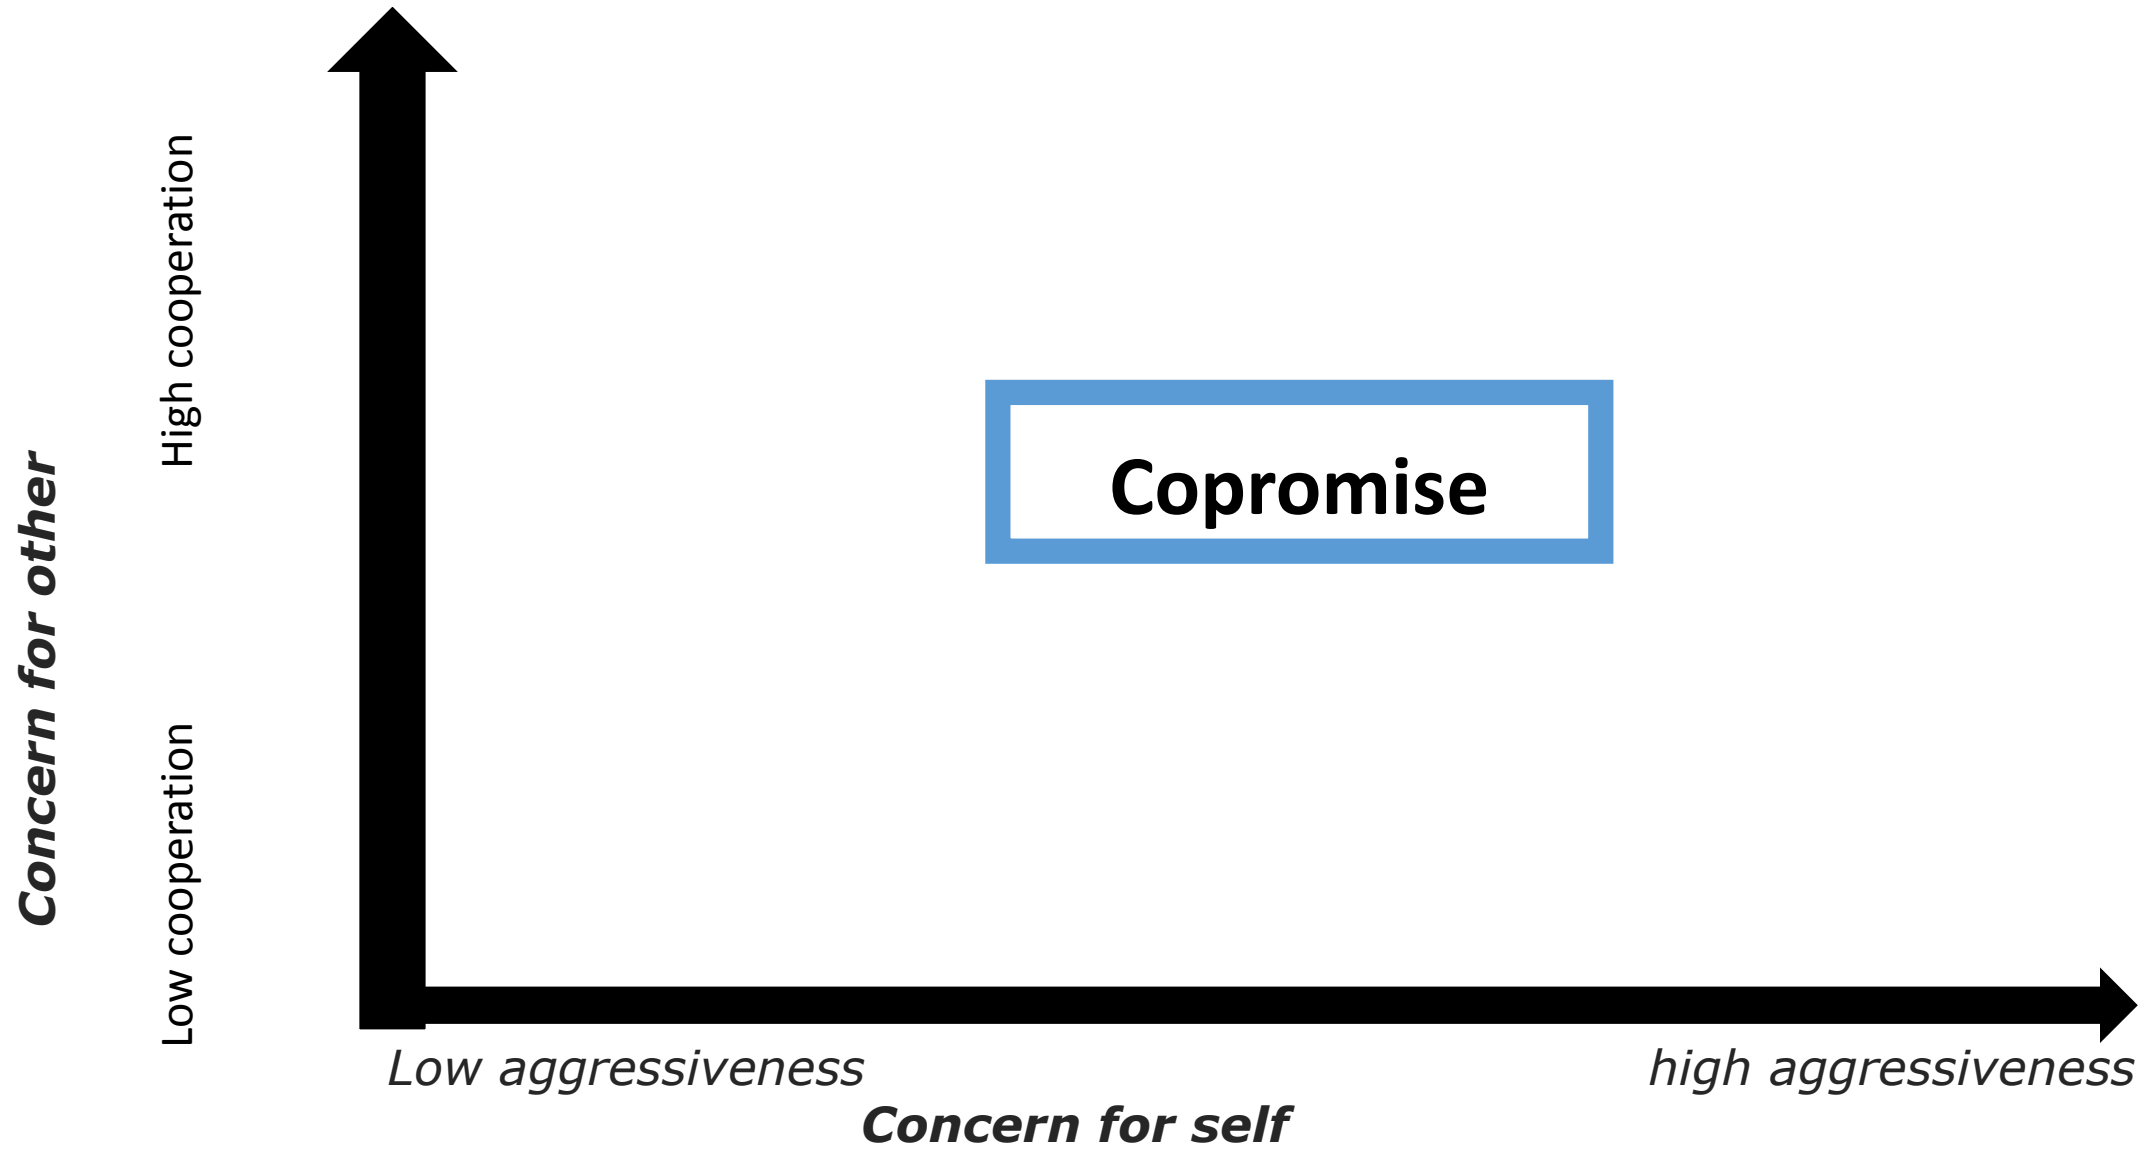

# The styles of conflict resolution

# The styles of conflict resolution

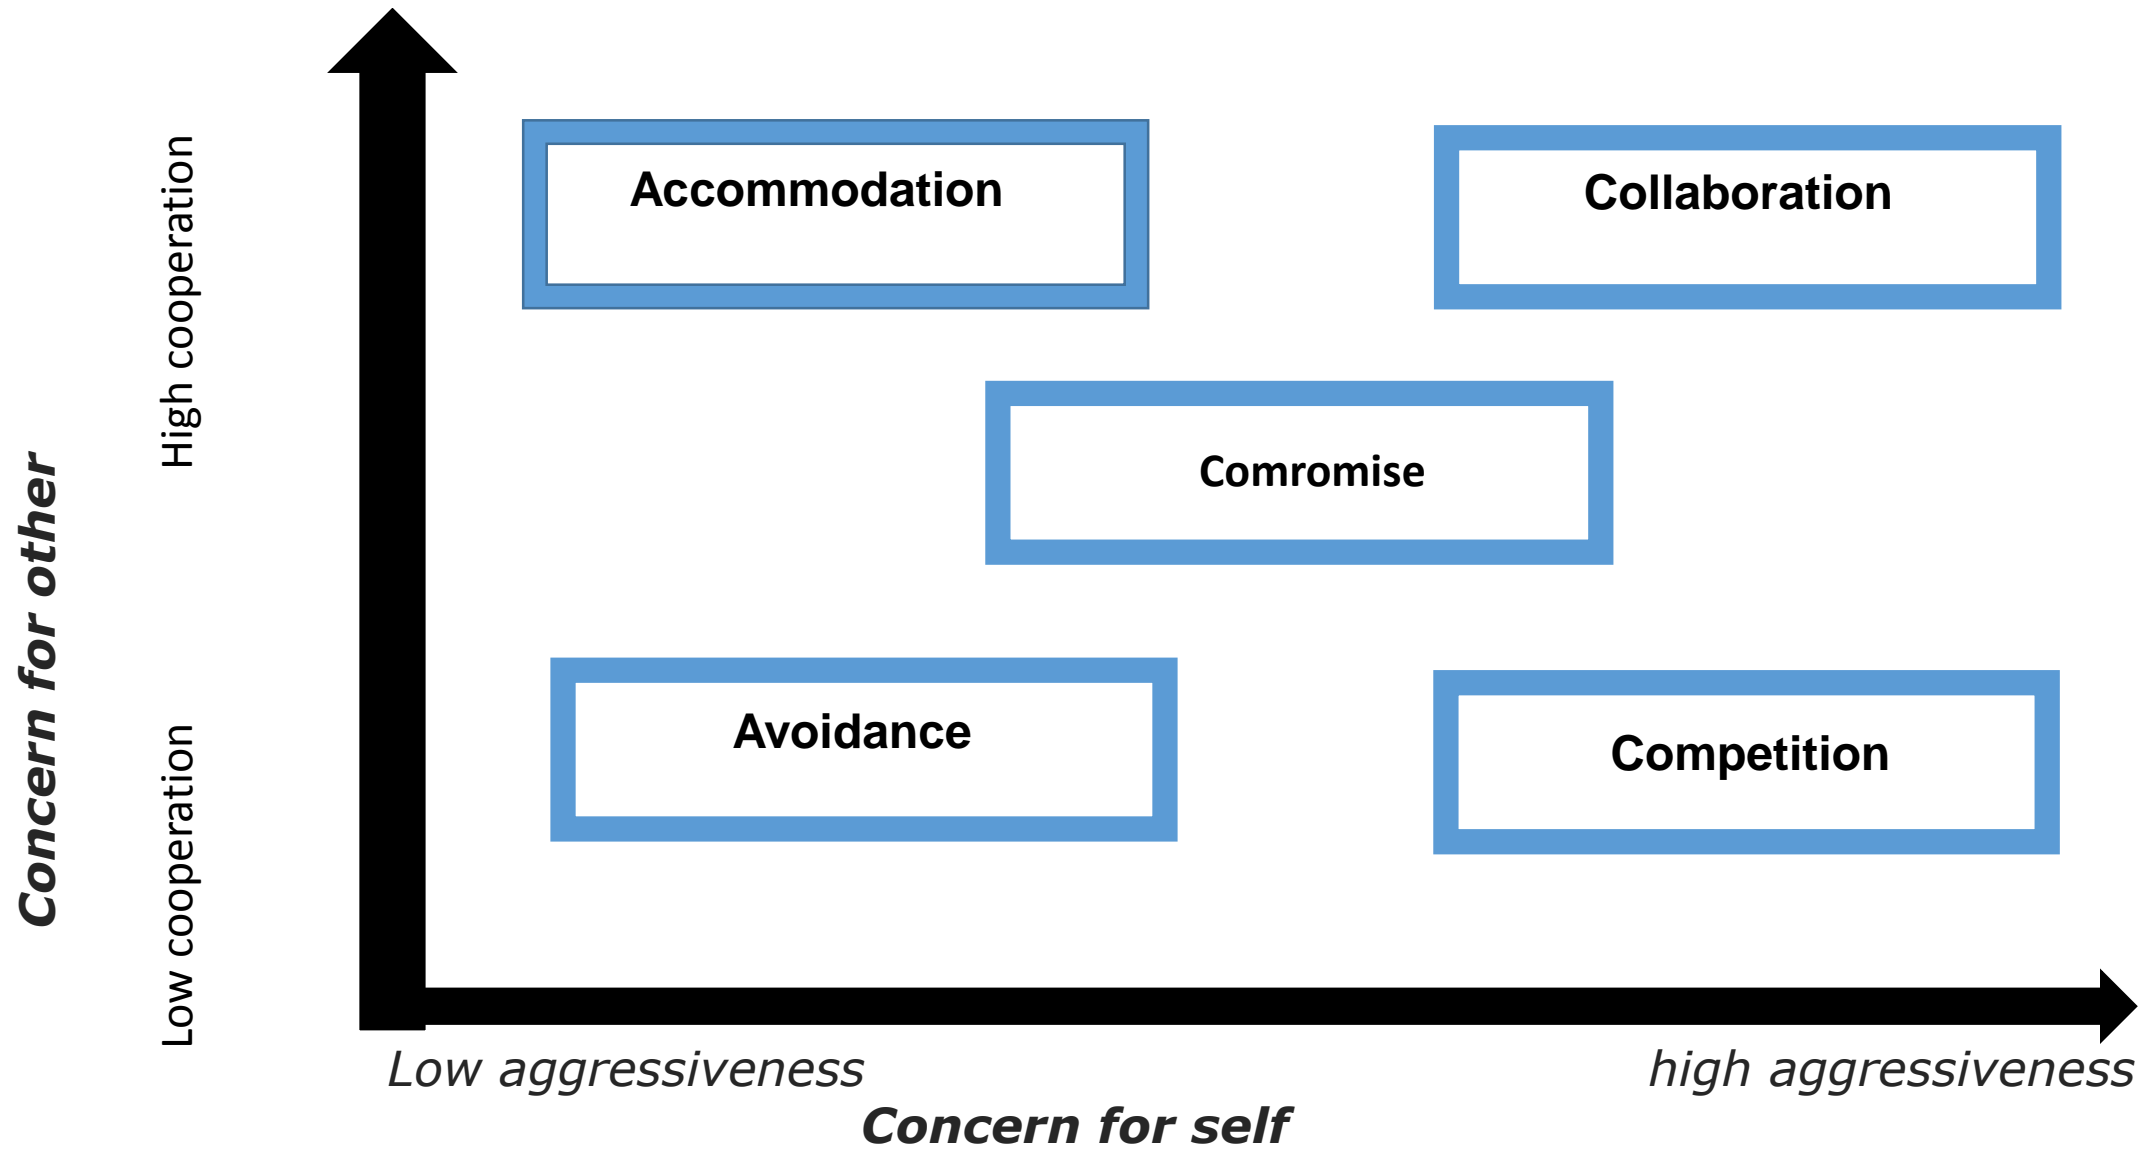

# The styles of conflict resolution

# The styles of conflict resolution

(Thomas 1976; Kilmann and Thomas 1975)

How we define the conflict problem, how we “punctuate” the triggering event that leads to the conflict problem, and how we view the goals for satisfactory conflict resolution are all likely to vary across cultures, situations, and individuals (Ting-Toomey and Oetzel, 2001, p.1).

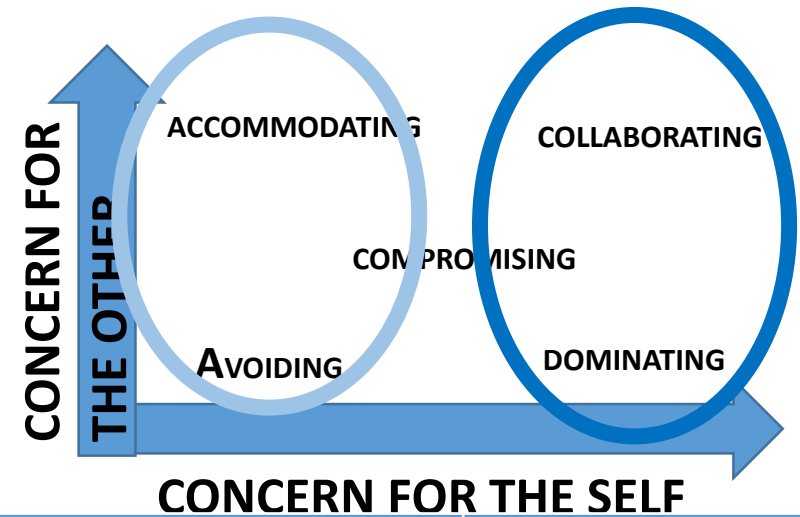

*The link between culture and conflict strategies is unique*

- It is valuable to understand how culture influences the way people manage conflict.
- Findings can be a valuable source in predicting conflict resolution patterns.
- Success and failure of international collaborations not only depends on managing economic and legal obstacles, but also on the effective handling of cultural differences in conflicts (Oudenhoven et al., 1998).

Among the cultural factors that may strongly affect the way people attempt to manage conflicts are VALUES they seek to achieve and expectations regarding the efficacy of various tactics in achieving the values (Ohbuchi et al., 1999).

Variations in conflict management as a function of country can be understood in terms of the cultural dimensions on which these countries vary. According to Hofstede (2001), national cultures may be distinguished along four fundamental dimensions.

# Do Asians differ in preferences for the various conflict management styles?

- Who are more likely to use a **dominating** style to solve an interpersonal conflict?

A) Chinese

B) Japanese

C) Koreans

D) there are no significant differences among Koreans, Chinese, and Japanese in dominating style

# Do Asians differ in preferences for the various conflict management styles?

- Who are more likely to use **an integrating style** to solve an interpersonal conflict with their supervisor?

**A) Chinese**

**B) Japanese**

**C) Koreans**

**D) there are no significant differences among Koreans, Chinese, and Japanese in integrating style**

# Do Asians differ in preferences for the various conflict management styles?

- Who are more likely to use **an avoiding style** to solve an interpersonal conflict with their supervisor?

**A) Chinese**

**B) Japanese**

**C) Koreans**

**D) there are no significant differences among Koreans, Chinese, and Japanese in avoiding style**

WHY it might be assumed that there are differences?

Because of differences of CULTURAL VALUES

**CONFLICT BEHAVIOR**

CULTURAL VALUES: MASCULINITY (FEMININITY) DIMENSION

Asians differ in preferences for the various conflict management styles.

- Who are more likely to use a **dominating** style to solve an interpersonal conflict?

A) Chinese

B) Japanese

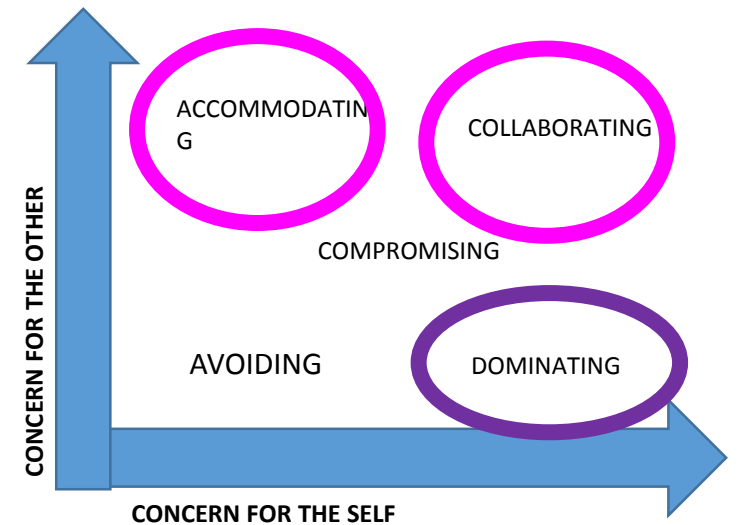

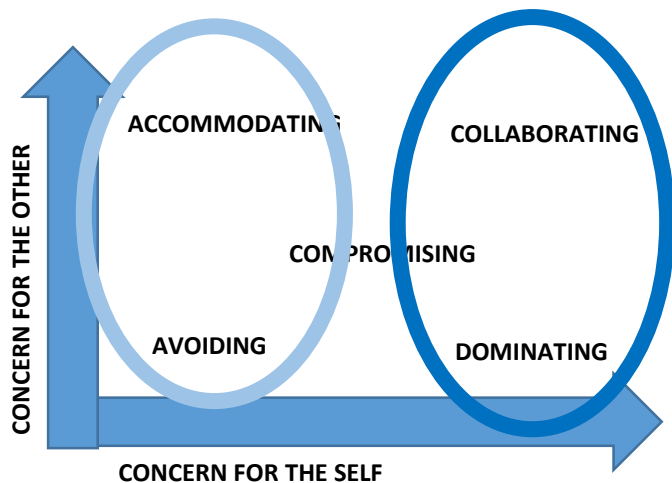

C) Koreans

- Where /How cultural values can explain country differences in conflict management styles among Asians (the Japanese, Koreans, Chinese)?

# The relationship between conflict style and cultural dimensions

Which **dimension** is to be regarded as **the most correlated** to preference for a **dominating** style?

There are **conflicting expectations** regarding the relative preferences of the nationalities being studied for the various conflict management styles.

# The relationship between conflict style and cultural dimensions

To overcome **conflicting expectations** **Onishi and Bliss (2006)** suggested to compute composite **MASCULINITY** scores predicting preference for dominating style.

COMPETING	MAS scores	LTO max	LTO obs		
Japan =	95 +	(118 -	88) =	125	<b>JAPAN</b>
Hong Kong =	57 +	(118 -	61) =	114	THAILAND
China =	66 +	(118 -	87) =	97	HONG KONG
Thailand =	34 +	(118 -	32) =	120	<b>VIETNAM</b>
Vietnam =	40 +	(118 -	57) =	101	CHINA
South Korea =	39 +	(118 -	100) =	57	TAIWAN
Taiwan =	45 +	(118 -	93) =	70	SOUTH KOREA

# Dominating

JAPAN	CHINA	(Hong Kong)	SOUTH KOREA	THAILAND	VIETNAM	TAIWAN		
								Kim et al., 2007 <i>(Conf. with supervisors)</i>
								Onishi and Bliss, 2006 <i>(Conf. with co-workers)</i>
								Chiu et al. (1998) <i>(In general)</i>
	 Demand-withdraw		 hostility					Lee et al, 2013 <i>(couples)</i>
	 defens							Oetzel et al., 2001 <i>(students)</i>
								Miyahara et al., 1998 ---
								Tjosvold et al., 2001 <i>(co-workers)</i>

Asians differ in preferences for the various conflict management styles.

- Who are more likely to use **an integrating style** to solve an interpersonal conflict with their supervisor?

**A) Chinese**

**B) Japanese**

**C) Koreans**

# Integrating

JAPAN	CHINA	(Hong Kong)	SOUTH KOREA	THAILAND	VIETNAM	TAIWAN	
							<i>Kim et al., 2007</i>
							<i>Onishi and Bliss, 2006</i> C with co-workers
							<i>Chiu et al., 1998</i>
							<i>Lee et al., 2013</i>
							<i>Oetzel et al., 2001</i>
							<i>Miyahara et al., 1998</i>
							<i>Tjosvold et al., 2001</i>

Asians differ in preferences for the various conflict management styles.

- Who are more likely to use **an avoiding style** to solve an interpersonal conflict with their supervisor?

**A) Chinese**

**B) Japanese**

**C) Koreans**

# Avoiding

JAPAN	CHINA	(Hong Kong)	SOUTH KOREA	THAILAND	VIETNAM	TAIWAN	
							Kim et al., 2007 <i>supervisor</i>
							Onishi and Bliss, 2006 C with co-workers
							Chiu et al., 1998
							Lee et al., 2013 <i>couples</i>
Pretend 							Oetzel et al., 2001
							Miyahara et al., 1998
							Ting-Toomey et al., 1991
							Tjosvold et al., 2001

# WHY there are differences?

cultural values have a direct effect on facework behaviors and an indirect effect on facework behaviors that is mediated through individual-level factors (Oetzel et al., 2001)

**CONFLICT BEHAVIOR**

how an individual views his or her relationship to others is affected by that person's culture's individualist and collectivist tendencies

**NATIONAL CULTURE VALUES** (culture level analysis)

/ one draw his/ her values and norms from cultural premises .

**INDIVIDUAL VALUES** (Individual level analysis)

46

Hong Kong  
25

20

20

20

18

17

CULTURAL VALUES: **INDIVIDUALIS - COLLECTIVISM DIMENSION**

The Chinese reported significantly higher **concern for the self** than Koreans who also reported significantly higher concern for the self than the Japanese.

The Japanese were seen to be more likely **to sacrifice individual goals and interests** for their group than the Chinese and Koreans

Chinese

Koreans

Japanese

Kim et al., 2007

# CONCLUSIONS

- It is true that Asian nations may be more similar to each other than to Western countries. However, characterizations of an “Asian” or “Eastern” approach to conflict management masks important differences that exist in the behavioral orientation of Asians.

Style preference develop over a person’s lifetime based on complicated blend of genetics, life experiences, family background, and personal philosophy. Thus subject level values are to be considered as more important than culture level values while understanding preferences for conflict management.
