

Título: Postdoctoral position associated to the project PID2019-107427GB-C31 /AEI/10.13039/501100011033 Galaxias reales y virtuales: de lo pequeño a lo grande. Financiado por la Agencia Estatal de Investigación (Ministerio de Ciencia e Innovación)

Centro: Universidad Complutense de Madrid (Departamento de Física de la Tierra y Astrofísica)

Tipo: Postdoctoral

Code of the position: PAII34/21-11/2021-07

descripción: We invite applications for a postdoctoral position at the UCM to work in star formation histories in nearby and intermediate redshift galaxies. The successful candidate will work as members of the GUAIX group (<https://quaix.ucm.es/>) and, in particular, with Patricia Sanchez-Blazquez and Javier Gorgas. However, the candidate will have the opportunity to work with members of the PHANGS collaboration (<https://public.nrao.edu/news/2019-alma-phangs/>) and the WEAVE stellar population (StePS) group. Candidates must hold a PhD in astrophysics or in a closely related discipline at the start of the contract. Starting date can be as early as October 5th.

Applications should be done through the webpage <https://www.ucm.es/paii34-21>
(position code: PAII34/21-11/2021-07)

The deadline for application submissions is **8th of July 2021**.

Any question about the position can be sent to: psanchezblazquez@ucm.es
