El actuario en Europa.

Aventuras y desventuras de un actuario por Europa

Un actuario es:

Un profesional de la ciencia actuarial que se ocupa de las **repercusiones financieras de riesgo e incertidumbre.**

Los Actuarios **proporcionan evaluaciones** de expertos de sistemas de garantía financiera, con especial atención a su complejidad, sus matemáticas y sus mecanismos.

Los Actuarios evalúan matemáticamente la probabilidad de eventos y cuantifican los resultados contingentes con el fin de **minimizar los impactos de las pérdidas financieras** asociadas con los eventos indeseables inciertos.

Estos riesgos pueden afectar a ambos lados de la hoja de balance y requieren de la **gestión de activos, gestión de pasivos** y las habilidades de valoración.

Capacidad de análisis, conocimiento del negocio y la comprensión de la conducta humana y los caprichos de los sistemas de información son necesarios para diseñar y gestionar programas de control de riesgo.

EL FRAU EN L'ASSEGURANCA MULTIRISC: EXPERIENCIES I TÈCNiques DE DETECCIÓ

A càrrec de:
Sr. Jaume Caballero
Sr. Ramon Esquerres
Sr. Josep Maria Vilamajó
Sr. Antonio Durlo
Sr. Santiago Romero

Dia 28 de Novembre de 2013
De 9:00 a 14:00 hores

Lloc: Auditori de Fiat:
Av. Diagonal, 648
08007 Barcelona

INTRODUCCIÓ

La lluita contra el frau en l'assegurança s'ha constituït en alguns mercats, com el nord-americà, en un dels principals objectius de les companyies asseguradores, un cop validada la importància que el maliciós té en els seus comptes de resultats. Al nostre país, l'existència de comportaments fraudulents en les assegurances multirisc ha anat quedant demostrada amb les ofres de frau presentades per les companyies. En moments com l'actual, de crisi econòmica, s'ha observat un repunt en el frau com a país asseguradors, davant el qual les companyies han d'implementar eines de prevenció i detecció.

La jornada compta amb la participació d'experts en la lluita contra el frau en assegurances multirisc, tant des del punt de vista de companyies asseguradores, com des del punt de vista dels altres actors en la seva detecció. Fiat, companyia amb gran experiència en la distribució d'assegurances multirisc, centrà la seva participació en la presentació de l'experiència adquirida en la lluita contra el frau en diversos mercats, fent especial èmfasi en l'estat de la qüestió, anàlisi dels elements, tipologia de frau, indicis, accions i instruments.

Una vegada la companyia detecta la possible existència de frau, intervenen els perits d'asseguradores que determinaran l'abast del frau i la seva quantificació, que en molts casos està demostrada per les investigacions de professionals que constataren que el sinistre no s'ha produït de manera fortuïta o si més no, ha estat de menor dimensió. Finalment per a defensar

and also:

Den Norske Aktuarforening
Félag íslenskra tryggingastærðfræðinga
Association Suisse des Actuairens

hereinafter called "the Associations"

Artículo 2 del acuerdo.

2. Each association shall provide for admission as a fully-qualified actuary any actuary who is a fully-qualified actuary of another member association of the Groupe Consultatif who wishes to pursue actively the profession of actuary in the country of the first association (the 'host association') and who applies for membership in terms of Article 3 of this Agreement, with the following conditions:
 - a. Membership shall be open to any such fully-qualified actuary of another qualifying association on application, without further requirements as to training, passing examinations or periods of experience, except as specified in Article 2(b) of this Agreement.
 - b. Notwithstanding Article 2 (a) of this Agreement, the host association may require an applicant, at his own choice, **either** to complete an adaptation period not exceeding three years, so that the applicant has at least three years' appropriate practical experience in total, **or** to pass an aptitude test:
 - i. where his education and training differ substantially from those covered by the diploma required in the host country; or
 - ii. where his work will involve professional activities regulated in the host country which are not regulated, or which he has not pursued, in his home country.
