

## **OUR MISSION**

The University Institute of Evaluation (IUE) is a transversal research, training and advisory center, made up of researchers from different disciplines and centers, which form a network for the development of research and the transfer of knowledge in the areas of management, analysis and evaluation of organizational performance, analysis and data management and design of statistical models.

The activities of the Institute are aimed at the university community, public sector organizations and private organizations.

## **Our principles:**

The principles that guide our actions are the following:

- The fulfillment of the commitments agreed upon with client.
- Meeting customer satisfaction.
- Constant support of clients within professional ethics.
- The recognition of intellectual property in all actions.
- Effective team work

## **Our Goals:**

- To provide advisory to university institutions and external organizations.
- To perform knowledge transfer activities.
- To disseminate knowledge through training.
- To establish alliances with other centers of the UCM, other universities and other agencies and organizations.
