LQC - Mackey topology for groups 20 years later

The locally quasi-convex (LQC) topologies compatible with a given group dualitywere investigated for the first time in the article:

Chasco, M. J.; Martin-Peinador, E.; Tarieladze, V. On Mackey topology for groups. Studia Math. 132 (1999), no. 3, 257--284.

We will give a survey of new results obtained after its appearance.

Organizado por el Instituto de Matemática Interdisciplinar (IMI)
y el Departamento de Álgebra, Geometría y Topología

**Fecha: Martes, 18 de junio de 2019
Hora: 12:00 horas
Lugar: Aula 225
Facultad de CC Matemáticas, UCM**
