Legal-Financial Effects, And Control Of The Social Impact For Sustainable Development: The Role Of Labels In The Investment And In The Public Contracts (DER2015-65374-R)

**Objectives:**

Academic experts and representatives from several institutions will discuss about the different lines of action to control emissions through the use of fiscal incentives and environmental taxes. The recent findings of the work carried out in multiple research projects in cooperation with international organizations will be disseminated (such as the UN Subcommittee on Environmental Taxation). Some possible partnerships between the public and the private sector will be pointed out, in the framework of their shared social responsibility
