

TÓRAX Y ABDOMEN CRANEAL DEL GATO

Anatomía por secciones y resonancia magnética nuclear

CONCEPCIÓN ROJO SALVADOR
M^a ENCINA GONZÁLEZ MARTÍNEZ

Sección Departamental de Anatomía y Embriología.
Facultad de Veterinaria . Universidad Complutense de Madrid.

ISBN: 978-84-124125-0-5

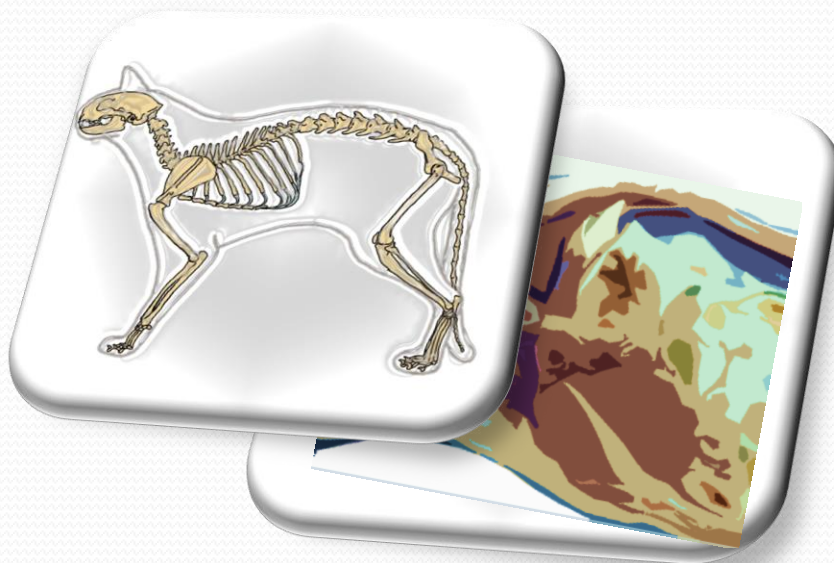

ACLARACIONES

Secciones Transversales: se muestra la vista craneal o caudal, lo cual se indica en cada caso.

Sección sagital: la parte craneal del animal se sitúa a la izquierda en la imagen y la caudal se sitúa a la derecha.

Secciones horizontales: se muestra la vista ventral; el lado derecho del animal se sitúa en la parte inferior de la imagen, y el lado izquierdo se sitúa en la parte superior; craneal es hacia la izquierda y caudal hacia la derecha.

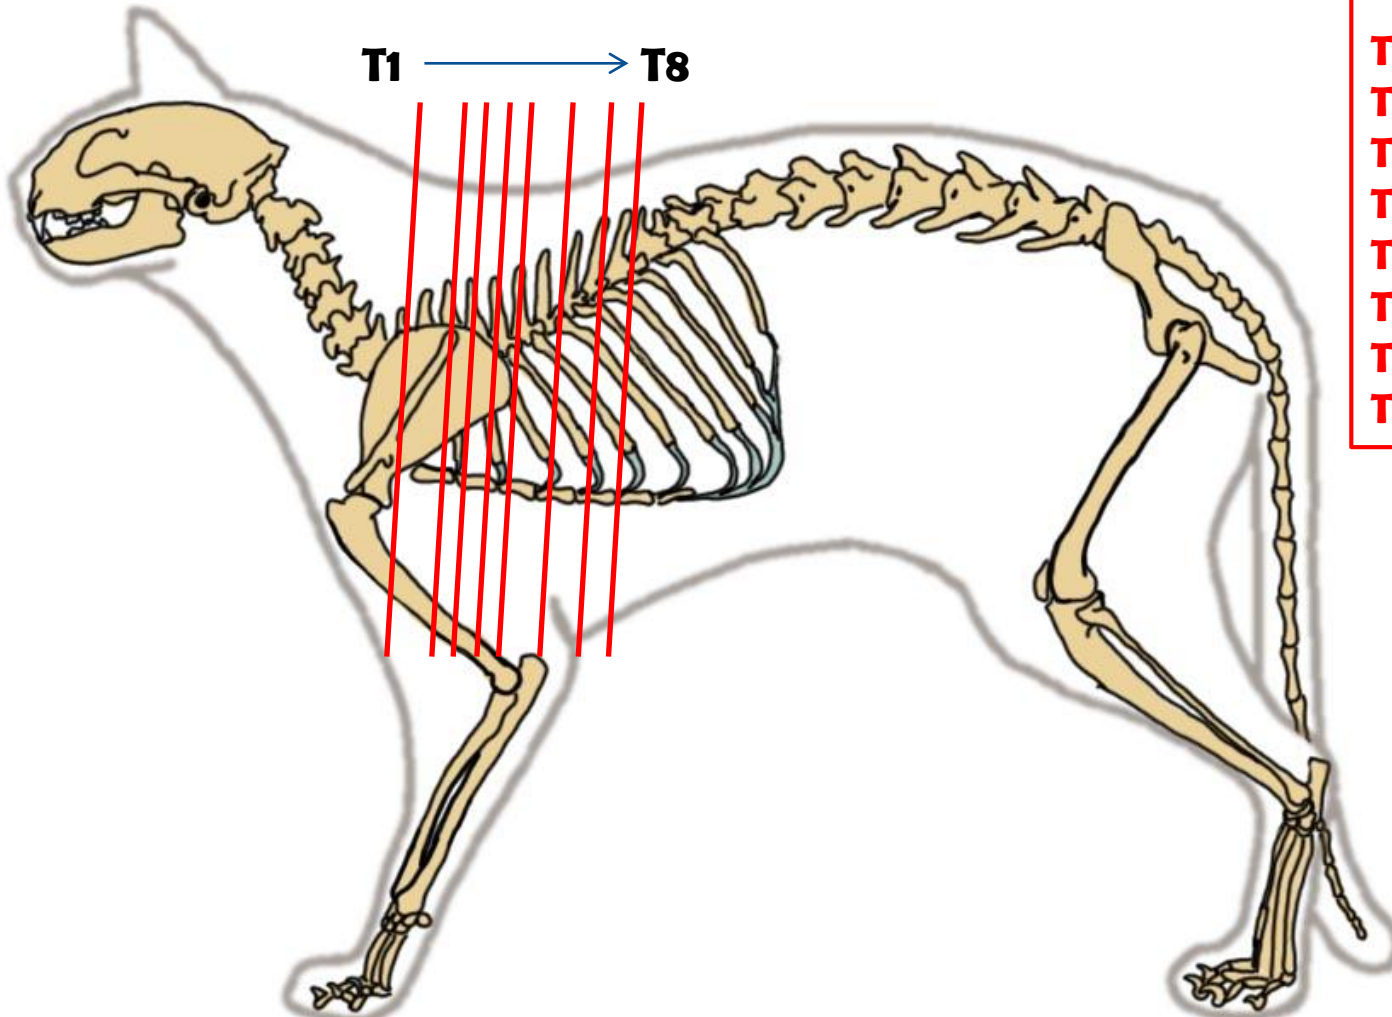

Imágenes de Resonancia Magnética Nuclear (RM): realizadas con un equipo Panorama 0.23 Tesla de Philips.

TÓRAX Y ABDOMEN CRANEAL DEL GATO

Anatomía por secciones y resonancia magnética nuclear

Agradecimientos:

Isabel García Real, por facilitarnos la obtención de las imágenes de resonancia, realizadas en el Hospital Clínico Veterinario Complutense.

M^{ra} Luisa Cárdenas Rondón por los dibujos del esqueleto.

Miguel de Vicente e Imanol Maiztegui, por su ayuda en la obtención de los cortes anatómicos.
