PRESENTACIÓN DE TESIS DOCTORAL: Geometric, non-linear and set theoretical problems in analysis

This PhD Dissertation Thesis covers a broad range of mathematical analysis, including Real Analysis, Set Theoretical Real Analysis, Functional Analysis, non-Archimedean Analysis, and Abstract Analysis, as well as the geometry of spaces of polynomials and polynomial inequalities. The aim of this talk is threefold: (1) to show new results, (2) to enhance existing ones, and (3) to find solutions to open problems in mathematical analysis.

Organized by: Departamento de Análisis Matemático y Matemática Aplicada and Instituto de Matemática Interdisciplinar (IMI)

Date: Wednesday, september 20, 2023, 13:00h

Place: B07

Facultad de CC. Matemáticas, UCM
