Premises and analysis of sustainable development factors and rural tourism in Albania

Several regions in Albania have interesting natural values and landscape beauties. The region of Shkodra has great flora and fauna, is very rich in biodiversity. Not only nature, but also cultural and historical values are important for the areas in North Albania. In these areas from a cultural and traditional point of view is a big perspective for the sustainable use of landscape, green economy development and for rural tourism development. Several sustainable activities are applicable in the regions eco-farms, agrotourism, rural tourism and other business for tourism. The main aim of the research presentation is to raise environmental awareness of the community and promoting ecotourism as a service of rural ecosystems, to build capacities of the researchers in the field and to promote international cooperation.
