Summary of CV

This section describes briefly a summary of your career in science, academic and research; the main scientific and technological achievements and goals in your line of research in the medium -and long- term. It also includes other important aspects or peculiarities.

I am a trained geriatrician and have led a geriatric department in a public hospital ever since establishing it in 1992. Having always been interested in research, I published my first scientific article as a medical student and I created a geriatric research group once the clinical department was consolidated. This group is now a well-established part of the Instituto Ramón y Cajal de Investigación Sanitaria (IRYCIS). In recent years, I have successfully secured over 2 million euros in funding through various national and European calls, as well as through some large industry-funded clinical trials. Initially, my research focused on Alzheimer's disease, but I gradually shifted towards frailty, sarcopenia, and geriatric nutrition, while maintaining some research lines on appropriate drug use in older persons, comprehensive geriatric assessment, and other aspects of geriatric care. My main achievement was leading the group that provided the first widely used definition of sarcopenia (EWGSOP). I am usually ranked among the top three leaders worldwide in this field and I currently lead an international initiative to provide a global definition of sarcopenia (GLIS). I am an influential, highly cited researcher, ranking among the top 100 in Spain in any scientific field and among the few geriatricians worldwide with an h-index over 70. I belong to several international research groups and sit on the advisory boards of major international societies, including EuGMS, IOF and ESCEO. I am founder and former president of the European Geriatric Medicine Society, as well as board member of the European Academy for Medicine in Ageing (EAMA), as well as a member of the WHO Clinical Consortium on Healthy Ageing. Locally, I have held various positions, including president of the Spanish Board on Geriatrics (Consejo Nacional de la Especialidad) and member of the safety committee of the Spanish Drug Agency. I am currently Editor-in-Chief of the journal European Geriatric Medicine (Q2) and sit on the editorial boards of many of the field's most prestigious journals (JAGS, JAMDA, Age and Ageing). I am also a corresponding member of the Real Academia Nacional de Medicina de España.
