

**Mick O'Donnell** is a lecturer within the Department of English Studies at the Universidad Autónoma de Madrid. His current interests are in corpus linguistics, in particular, in studying learner corpora to profile what grammatical features are most at stake at each proficiency level, for a given mother tongue and learning context. He is also well known for developing software for multi-layer corpus

development: *UAM CorpusTool*.

He has previously worked in several major research centres, including, Information Sciences Institute (Los Angeles), Department of AI at the University of Edinburgh, IRST/ITC (Trento, Italy), IPSI/GMD (Germany), as well as visiting stays in centres such as ITRI (Brighton, UK), University of Waterloo (Canada), Telecom Research Labs (Melbourne, Australia), and Microsoft Research Lab (Sydney, Australia).
