

## Elective Subject

(Academic Course 2025-2026)

**Subject title: Digital Health Intervention**

**Code:**

**Subject:** Elective

**Responsibility Center:** Faculty of Nursing, Physiotherapy and Podiatry

**Credits:** 3 ECTS

**Number of places offered:** 45

	Total (30% attendance)	Theory	Seminars	Practices	Others
<b>Classroom activities</b>	24	15	9		

Course schedule: (semester, day and schedule): First semester, Thursday from 14:30 to 15:30

### STUDENT PROFILE (University degrees for which they are offered, if applicable)

Nursery and phisiotherapy

### BRIEF DESCRIPTOR

Digital health has been implemented in our daily lives as health care providers. To know their foundations and their tools and knowing how efficiently implement them is basic within the knowledge and competencies that we have to rely on in digital clinical practice that has more and more strength every day in our professions.

### OBJECTIVES

#### GENERAL OBJECTIVE

Acquire the fundamental skills for the implementation and use of the necessary tools for an effective use of digital health consultation.

#### SPECIFIC OBJECTIVES:

Discover the foundations of digital health.

Improve the management of the tools available to be able to develop an efficient digital consultation.

Develop a positive attitude towards digital health consultation.

Encourage the use of different live consultation channels such as Teams, Skype, Collaborate or Google Meet with teaching on the different platforms.

### KNOWLEDGE, SKILLS AND COMPETENCES

#### TRANSVERSAL COMPETENCES

Instrumental:

TC.1 Know the rights and risks in the world/digital health.

TC.2 Know the specific language of digital health.

TC.3 Know and discover the main computer applications related to digital health

TC.4 Know the sources of information used in digital health.

Personal:

TC.5 Use technological resources for communication  
TC.6 Use and effectively process information critically and systematically  
TC.7 Learn to search, obtain and process information  
TC.8 Learn how to create content

Analytical:

TC.9 Acquiring an active, critical and realistic attitude towards technologies and technological means  
TC.10 Develop curiosity and motivation for learning and improvement in the use of technologies  
TC.11 Assessing strengths and weaknesses of the technological means  
TC.12 Respect ethical principles of the use of digital health

Learning outcomes

TC 1-4:

- Understand the current situation of digital health.
- Use different digital tools efficiently.
- Develop useful tools for digital consultation.

TC 5-8:

- Develop reference databases for digital consultation.
- Develop your own content for digital consultation

TC 9-12

- Evaluate own and other content with a critical attitude
- Evaluate the different working channels according to the digital environment to be used

### **TEACHING ACTIVITIES** (theoretical, practical, seminars, workshops, etc.)

15 theoretical classes online, to develop skills in different virtual environments such as: Teams, Skype, Collaborate, Google Meet.

2 Practice/Seminars:

- 1: Making poster/infographic for resource bank
- 2: Making live video in videocalling format.

### **CONTENT TOPICS**

LESSON I. INTRODUCTION TO DIGITAL HEALTH

1. Principles of interventions in e-Health.
2. Main computer applications used in e-Health

LESSON II. DIGITAL TOOLS

3. Digital Health Intervention Channels
4. Existing digital health channels and tools: analysis and selection of materials for our digital consultation

LESSON III. IMPLEMENTATION OF DIGITAL CONSULTATION

5. Detection of health and implementation needs.
6. The timetable for creating and implementing tools for digital consultation
7. Phases of implementation of the digital consultation
8. Monitoring and evaluating the tools and the implementation of the digital consultation.

### **EVALUATION**

ACTIVIDAD EVALUADORA	PONDERACIÓN	OBSERVACIONES	PUNTUACIÓN MÁXIMA
Test	60%	Written test where the theoretical contents developed in the master classes, practices and complementary activities will be evaluated. Minimum score of 5 points	6
Seminars	20%	Preparation of the 2 mandatory practices. Minimum score of 5 points	2
Attendance	20%	Class attendance	2
