

Common IT resources, computation

(Sharing is caring)

r/funny

D. Nieto
(d.nieto@ucm.es)

iparcos.ucm.es domain has been issued by the CPD,
which enables us to:

- serve a public web as www.iparcos.ucm.es
- use, e.g., d.nieto@iparcos.ucm.es (upon request, user@iparcos.ucm.es will only be an alias for user@ucm.es, not an independent email address)
- configure computer hostnames as computer@iparcos.ucm.es

IPARCOS Workstation:

- 2x Intel(R) Xeon(R) Silver 4114 CPU @ 2.20GHz (40 threads)
- 64 GB RAM
- 4 TB SSD, 14 TB HDD
- NVidia GTX 2080Ti, 11GB
- NVidia RTX 3070, 8GB (Contributed by J. López Herraiz – GFN)
- Running on linux (Ubuntu 20.04)

- New users welcome
- Support and maintenance on best-effort basis by DN

- We (groups and individual researchers) have resources that sometimes are not enough, some other times are idle: pooling?
- Dedicated calls for IT equipment we could apply for as IPARCOS?
- Computing resources easier to obtain than IT personnel for deployment and maintenance of the infrastructure
- Thoughts?
